May 3, 2010

NOFP is pleased to announce continued production and shipping of all of NOFP products.

Although on March 29 NOFP suffered suspected arson fire damage to its plant, NOFP has continued to ship from safety stock inventory and manufacture product from newly leased space and rebuilt production equipment. NOFP is currently shipping all Barrier, BarrierXT and BarrierX5 as well as all MicroFoil and Solex products in most configurations.

As a testament to NOFP's employees, vendors and faith in our long-term customer relationships, NOFP was able to ship stocked inventory within one week after the fire and resume normal operations shortly thereafter. NOFP's offices were unharmed by the fire and within a week all services were up and running with replacement material and customer's orders being processed as usual.

In addition, NOFP will be relocating to a larger newer facility within the next 60 days with new offices and equipment.

Please contact NOFP or your local sales representative for definitive shipping schedules on your existing or new orders.

Regards,

Wally Radjenovic
President, NOFP, Inc.
